

Dragnet[®]DUST

Insecticidal Powder
Industrial Strength

Dragnet[®] Dust

Double strength superfine Dragnet[®] Dust is perfect for wall cavity treatments

- Cavity walls may be treated if infested or suspected of harbouring ants, cockroaches, silverfish and spiders.
- You can do this directly through the weep holes.
- Apply insecticide dust using the electric duster with a wall cavity nozzle.
- Where weep holes are inaccessible with duster you may drill holes in mortar joints at 2 m spacings to dust. You should always plug holes with suitable sealant.
