

Black House Ant

Product applied at label rate and aged for 16 weeks. Pest left on surface for 24 hours

Tile - non-porous surface

Ply - porous surface

Ian Ridley-Bugsi P/L

Label (extract)

Pests	Rate	Critical comments
Ants	80-160ml /10L	On non-porous surfaces apply as a coarse spray at the rate of 1L of emulsion per 20m ² ensuring thorough coverage of the treated surfaces. When treating non-porous surfaces do not exceed the point of run-off. On porous surfaces or use through power equipment, spray at the rate of 1L of emulsion per 10m ² ensuring thorough coverage of the treated surfaces. When treating porous surfaces do not exceed the point of run-off. For perimeter treatments apply the prepared emulsion to a band of soil or vegetation two to three meters wide around and adjacent to the structure. Also treat the foundation of the structure to a height of approximately one metre. Use a spray volume of 5 to 10L per 100m ² . Higher volumes of water may be needed if organic matter is present or foliage is dense.
