

German Cockroach

Biflex® Mikron is excellent for the control of German Cockroaches, which are notoriously challenging pests to treat because the source of the infestation is often difficult to locate. Successful treatment of German Cockroaches requires an integrated pest management (IPM) approach that should include investigation and location of harbourages and foraging sites followed by a crack and crevice treatment.

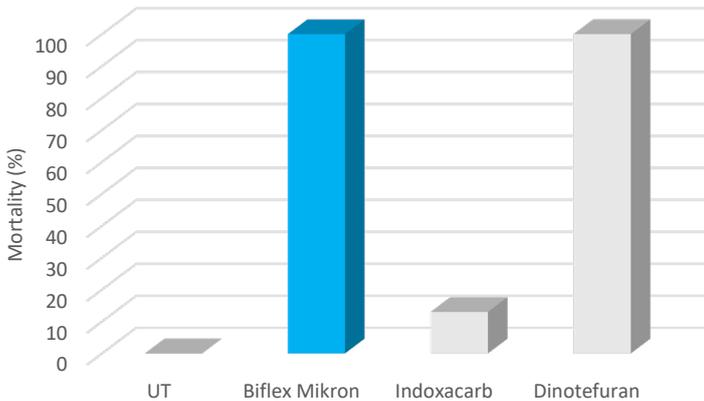

Product applied at label rate and aged for 7 days. Pest left on surface for 30 minutes.

Tile - non-porous surface

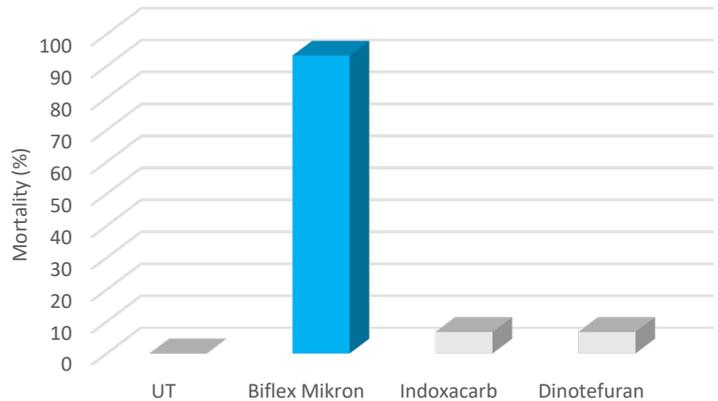

Product applied at label rate and aged for 16 weeks. Pest left on surface for 24 hours.

Tile - non-porous surface

Ply - porous surface

Label (extract)

Pests	Rate	Critical comments
Cockroaches (inc American and German)	80-160ml /10L	In an outdoor situation, pay particular attention to protected dark areas such as cracks and crevices, under floors, eaves and other known hiding or resting places. For indoor use, pay particular attention to protected dark areas such as cracks and crevices, behind & under sinks, stoves, refrigerators, furniture, pipes, cornices, skirting boards & other known hiding or resting places. Do not use as a space spray.
