

Termite Management

Biflex[®] Ultra-Lo-Odour Termiticide is the proven choice for reticulation systems

Features & benefits

- Absolute quality EC formulation - low on odour, safe on equipment
- Predictable, reliable and proven over decades
- Dual action kills and repels all Australian subterranean termites
- Non-leaching
- Cost effective and provides a minimum of 10 years protection (South of the tropic)
- FMC quality assured
- Eligible for FMC's Warranty ensuring property owner peace of mind
- Formulated in Australia
- Available in 5 L and 20 L bottles

Product description

Biflex Ultra-Lo-Odour Termiticide and Insecticide is the benchmark in terms of performance and reliability. It is a repellent termiticide containing 100g/L Bifenthrin. It is a group 3A insecticide from the family known as the pyrethroids. Effective on all subterranean termite species in Australia for at least 10 years (south of the tropic of Capricorn), it has exceptional soil stability, longevity and activity. Biflex Ultra-Lo-Odour combines this physical and chemical stability with formulation quality that ensures performance across a range of delivery methods.

Where to use

For termite management Biflex Ultra-Lo-Odour is registered for the control of all Australian subterranean termite species. It is recommended for long-term pre and post construction applications (horizontal and vertical) as well as nest eradication and the protection of poles and fence posts. It is particularly suited to use in reticulation systems where the predictably even distribution of the active ingredient within the emulsion is absolutely paramount. No issues of settling, blocking or inconsistent delivery of the active ingredient to deal with or worry about. Once deposited it stays right where it is placed for peace of mind treatments.

How to use

Biflex Ultra-Lo-Odour is extremely versatile and can be applied using various application techniques such as spraying, trenching, rodding or reticulation systems. Duration of product performance can be selectively varied based on initial dose applied. It is important the full product label be consulted before selecting an application rate. The application of Biflex Ultra-Lo-Odour as a component of a termite management system must remain compliant with the requirements set out in the Australian Standard AS 3660 series.

Professionals**

Biflex Ultra-Lo-Odour Termiticide use rates for the control of SUBTERRANEAN TERMITES

SITUATIONS	All areas SOUTH of the Tropic of Capricorn (except Tas)		All areas NORTH of the Tropic of Capricorn	
	RATE	EXPECTED PROTECTION PERIOD *	RATE	EXPECTED PROTECTION PERIOD *
Pre-Construction Barriers Under slabs and under suspended floors with less than 400 mm crawl space	1 L/100 L	At least 10 years	1.5 L/100 L	5 years
			1.0 L/100 L (Note 1)	4 years
	500 mL/100 L	10 years	750 mL/100 L (Note 1)	3 years
			500 mL/100 L (Note 1)	2 years
Perimeter Barriers For new and existing buildings	1 L/100 L	At least 10 years	1.5 L/100 L	5 years
			1.0 L/100 L	4 years
	500 mL/100 L	10 years	750 mL/100 L	3 years
			500 mL/100 L	2 years
250 mL/100 L	3 years	750 mL/100 L	3 years	
		500 mL/100 L	2 years	
Post-Construction Barriers Under slabs and under suspended floors with less than 400mm crawl space	1 L/100 L	At least 10 years	1.5 L/100 L	5 years
			1.0 L/100 L	4 years
	500 mL/100 L	10 years	750 mL/100 L	3 years
			500 mL/100 L	2 years
Reticulation Systems Perimeter and/or service penetration treatment only	1 L/100 L	At least 10 years	1.5 L/100 L	5 years
			1.0 L/100 L	4 years
	500 mL/100 L	10 years	750 mL/100 L	3 years
			500 mL/100 L	2 years
250 mL/100 L	3 years	750 mL/100 L	3 years	
		500 mL/100 L	2 years	
Reticulation Systems Cavity infill & footing barriers	500 mL/100 L	5 years	1.0 L/100 L	2 years
Protection of Poles & Fence Posts	500 mL/100 L	10 years	1.5 L / 100 L	5 years
			1.0 L / 100 L	4 years
			750 mL/100 L	3 years
Nest Eradication	500 mL / 100 L	Not applicable	500 mL / 100 L	Not applicable

Note 1: This rate must be used in conjunction with a certified reticulation system that is capable of distributing the Termiticide & Insecticide emulsion according to the product label and the Australian Standard AS 3660 Series.

*The need for retreatment is to be determined as a result of at least an annual inspection, or more frequently in high risk areas, by a qualified Pest Control Operator. The actual protection period will depend on the termite hazard, climate, soil conditions and rate of termiticide used.

The full product label should be consulted before using this product.
