

# NOTICE TO PRINCIPAL BUILDER & BUILDING CONTRACTORS

Reference: Interference with the HomeGuard® Precision Termite Management System

Post the installation of HomeGuard®, it is crucial that the products installed are not damaged or altered by third parties.

FMC understands that rectification or adjustments may need to take place during the construction process by carpenters, plumbers, electricians, tilers etc.. It is critical to contact your HomeGuard® Accredited installer if there is damage caused post the installation or if new work will affect the installation.

FMC would like to draw your attention to AS3660.1.2014 reference : 1.4.1.1 Breaching

## 1.4.1.1 Breaching

The passing of termites through a hole or gap in a termite management system.

**NOTE:** Examples of breaches include the removal of a section of treated soil from a chemical soil termite management system, or a perforation or a disjunction in a physical management system.

The installation guidelines are available to all construction and design professionals in the form of an installation manual. The current version is [HomeGuard® Precision Termite System Manual Version 5D](#).

For more information on HomeGuard® and the product warranty please refer to the [HomeGuard® Property Owner Tips](#) guide.

These and other helpful documentation are also available on the FMC website.

FMC Australasia Pty Ltd will not accept any responsibility for termite ingress as a result of the interference or damage to the system by other parties.
